

Finding The Correct Size Inkwell Insert

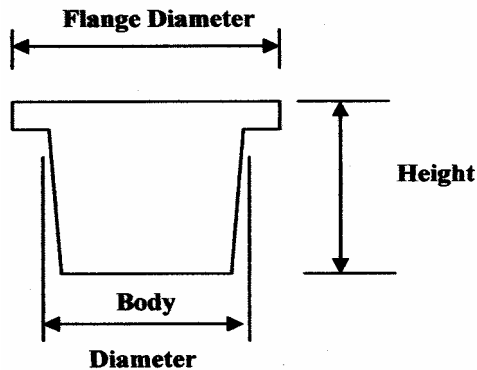

There are three critical dimensions in selecting the correct insert for your inkwell or inkstand: **Flange Diameter; Body Diameter; Height**

Your well has a hole through which the insert must fit. This must be larger Than the *Body Diameter*.

There is a recess around the hole for the insert to sit in. The *Flange Diameter* can not exceed this recess diameter.

You must assure there is enough *Height* for the insert to sit in the recess without hitting the bottom of the piece. Usually, this is not a critical dimension.

Since we receive our inserts from an English supplier, all dimensions are listed in millimeters. Our ten traditional “letter” sizes are indicated for cross reference. Special sizes can be custom made. Send the dimensions required for a quotation.
